TABOU

Da Curve 73 2005

Descrizione

Based on the shape of the last years test winner, Tabou brings forward the evolution of the 'classic wave' board – Da Curve. The boards are shorter with a new tail rocker line, which gives the board a more reactive nature without losing what made the previous years so easy and radical.

Designed for sailors who want a carving board with lots of speed and control in the turns and especially down-the-line windsurfing, making it easy to draw powerful curves in medium to big waves with full speed.

Da Curve has a super fast 'rail to rail' turn due to its narrow tail and fine details, giving you confidence off the bottom turn allowing you to set up for the big smack.

The center section has a flat rocker designed for early planning and easy speed, which makes it an excellent jumping board and ideal for onshore conditions.

Da Curve is an easy radical board.

Costruzione

Bottom> Double Sandwich S glass

Deck > Double sandwich Carbon Kevlar

DESIGN DETAILS

Triple curve rocker line speed easy planning, turning, forgiving on reentry

Outline narrow power carving, control, fast rail to rail

Shorter outline lighter nose = easy planning and well balanced board.

V Double concave forgiving with lot of grip in the turn and smooth on chop

Fin rails lot of grip and faster rail to rail

Heavy duty construction free your mind from breaking the board
